

Solid Rubber

Smartplay Drawing Balls

Smartplay Drawing Balls are the highest quality rubber balls available. The production consists of a 14 step process including stringent quality control inspections. At the time of manufacture the balls are placed in matched sets with extremely close tolerances of weight and size. The ball sets are packed in foam lined, lockable plastic cases. Smartplay offers many different color balls and colored inks as well as custom images. Compare and see that no other manufacturer can match the quality of the Smartplay balls.

Solid Rubber

Smartplay Drawing Balls

WEIGHT

Weight of each ball is measured in grams (gms). The weight of each ball is between 77.80 and 79.50 grams. The variation of each ball in any given set is +/- .60 grams from the average weight of all balls within that set.

SIZE

The average measurement of the balls on any axis is 51.10 mm. +/- .5 mm.

TEXTURE

The balls are examined closely, to ensure surface consistency.

MATERIAL

Natural gum rubber

NUMBERING

The numbers are printed twelve times per ball; figures underlined; printed with black ink.

COLORS

Balls are available in the following colors; red, blue, white, pink, green, orange, yellow, purple and gold.
